NATIONAL WINDOW FILMS

ENVIRONMENTAL POLICY

National Window Films LLP recognises that through its activities and services it has the potential to have an impact on the environment. Consequently, it seeks to minimise or prevent any harmful environmental effects that result from its activities whenever and wherever they occur.

National Window Films is committed to delivering a quality service to its customers and as part of this process the management of its environmental impact is as important as the management of all other aspects of the business. We seek to develop a sustainable environmental improvement programme, assessing and measuring our environmental impacts with clear environmental improvement objectives.

As company directors, myself and Mr Michael Dew have responsibility for the environmental policy and performance and I have personal responsibility for environmental policy development, implementation and co-ordination across the company

National Window Films environmental priorities are:

- to measure, monitor and manage our energy consumption;
- to reduce and recycle more of our consumable waste.

As part of our commitment to continual improvement, we will:

- meet, and where appropriate, exceed all relevant legislative, industry and other relevant standards;
- promote recycling and the use of recyclable materials;
- reduce, as far as possible, our use of non-renewable energy resources and develop an energy efficiency programme;
- reduce, wherever practicable, our level of harmful emissions;
- reduce, as far as possible, the visual and noise impacts of our activities;
- include environmental issues as an agenda item for all management review meetings;
- develop environmental awareness and sound environmental practices amongst all of our employees through the provision of training;
- engage with significant suppliers to help minimise their environmental impact and improve waste management practice.

The company is committed to creating, maintaining and continually improving an environmental management system that meets the requirements of ISO 14001.

This environmental policy is displayed on company notice boards and available on the company website.

Martin I Dew

Director
National Window Films
